REGINALD HOLMES

About Us

We are a manufacturer of eco-friendly building kits, specialising in crafting elegant and sustainable living spaces using cutting-edge SIPs (structural insulated panels). Our headquarters are located in Wrexham, North Wales, and we have a network of install partners throughout the UK.

Our goal is to make a world of difference, one space at a time. Our team is deeply committed to designing environmentally friendly structures that not only reduce our carbon footprint but also help people connect with nature. Our buildings are incredibly energy-efficient and require minimal heating and cooling, making them ideal for those who want to live sustainably.

The mark of
responsible forestry

Flexible Space to Relax, Entertain & Anything in Between

We offer eco-friendly kits made of sustainably sourced timber including carbon negative cladding options.

With unlimited sizes available our structures are built with SIPs, which provide an air-tight seal and are utilised to make the floor, walls, and roof. As a result, our buildings remain comfortable throughout the year, staying cool in the summer and warm in the winter.

What are SIPs?

SIPs, or Structural Insulated Panels, are a revolutionary building material that has taken the construction industry by storm. We manufacture our SIPs by injecting liquid polyurethane between two sheets of OSB3 (an engineered structural timber board) held in moulds while under extreme pressure. The polyurethane bonds the OSB3 together and creates an incredibly high performing insulation.

Some of the most significant advantages of using SIPs is their excellent thermal insulation properties and speed of build. The Polyurethane foam in the core of SIP panels has a low u-value, meaning it can effectively prevent heat transfer through the walls, floor and roof. This feature can help you save money on energy bills as your heating and cooling systems will not have to work as hard to maintain a comfortable indoor temperature.

Thinking of Something More Bespoke?

Are you looking for something particular?
Our highly skilled in-house designers can craft a
tailor-made structure that perfectly fits your needs.
From luxurious stable blocks to car showrooms,
we can help turn your dreams into reality.

Doors & Windows

Proudly made in the UK; our collection of stylish uPVC and aluminium windows and doors are custom made to order.

With a range of options to choose from, styling your building has never been easier.

Our Doors

French

French doors are an elegant and classically simple external door option. Our uPVC French doors are expertly crafted for superior quality and style.

Bi-Folding

These superb panoramic doors offer the latest in design, quality and thermal efficiency with very low maintenance. Once folded back, they create a large opening with a low threshold for easy access.

Find an Installer

Looking for an installer for your building project? Look no further! While we do not offer an installation service, we have a vast network of highly professional SIP installers all across the UK. We only recommend companies that have installed a minimum of 3 of our building kits of which we have received positive feedback directly from the end customer.

Finding a reliable installer can be a daunting task, but we're here to make it easy for you. You don't have to waste time searching for installers online or asking for recommendations from friends and family. Our network of specialist SIP installers have been rigorously vetted and tested to ensure that they meet our high standards of quality and professionalism.

To find an installer near you, simply reach out to us and let us know your location and the type of building kit you're interested in. We will then connect you with a recommended installer in your area. Assembly option for both on-site and factory build depending on your requirements.
